```csharp
Dog
using System;

public abstract class Animal
{
    public abstract void animalSound();
    public void Eat()
    {
        Console.WriteLine("Eating");
    }

}
public class Dog:Animal

{

        public override void animalSound()
        {
            Console.WriteLine("Barking");
        }
    }

    public class Abstraction_program
    {
        static void Main(string[]args)
        {
            Dog obj=new Dog();
            obj.animalSound();
            obj.Eat();
            Console.ReadKey();
        }
```

file:///C:/Users/88013/documents/visual studio 2

```
Barking
Eating
```
